

# ITP's new Cyclone® wheel

## ITP introduces the latest Storm Series 8 spoke wheel complete with color inserts

ITP announced on March 19, 2018 the launch of the new Cyclone wheel for ATVs and side-by-side vehicles. The 8 spoke wheel features custom color accents and ROCK ARMOR® technology that delivers enhanced performance and dramatic finishes for unique style and design.

"The Cyclone wheel is ITP's latest addition to its Storm Series collection," says Rhett Turpin, Director of ITP Sales at The Carlstar Group. "Riders now have the opportunity to apply colors to their own vehicle right at home. The inserts are easy to install and they display an attractive look to each wheel. Not only does the Cyclone offer color modification, but it allows the rider to flip the direction of the insert, providing the ability to create a left hand and right hand specific rolling direction. Additionally, the new Cyclone wheel adheres to the Storm Series standards of exceptional strength and durability."

Each Cyclone wheel comes standard in a matte black with machined face finish and a full set of red, white and blue color inserts. The applied color inserts can be a single color to coordinate with vehicle colors, or can be a mix and match insert for a unique color combination.

The Cyclone wheel is outfitted with ITP's exclusive ROCK ARMOR® inner wheel lip for increased structural support and comes complete with an installed custom center cap and chrome valve stem. Backed by ITP's Limited Lifetime Warranty
